Pitjantjatjara Language Activity Packs

To assist children attending schools in remote Aboriginal communities, DSF has developed a number of sets of targeted pre-literacy resources. These resource kits are based on material developed for a pilot program run in the Ngaanyatjarra Lands during 2015 and 2016 called “Improving Literacy through Home Language”. The response from educators and families living and working in the Ngaanyatjarra Lands to the resource kits was very positive. DSF was contacted by other communities and a number of new language kits (in home language and languages targeted for revival) were developed.

One of the kits produced was in response to a request for Pitjantjatjara resources. The Pitjantjatjara Language Activity Pack includes language activity cards which focus on the key phonological awareness skills of rhyming, syllabification and phonemic awareness. These innovative resources make use of familiar pictures and language which provides an essential bridge from Pitjantjatjara to standard Australian English.

Each boxed kit includes a teacher’s manual, CD containing printable materials and three sets of playing cards (rhyming, syllable and phoneme cards).

The activities are intended to be delivered by (or with the support of) a Pitjantjatjara speaker. Training on how best to use the language activity packs is highly recommended and is available via DSF.
